

Reviewer Guidelines: Reviewing Process

Web-Link to this page: <https://ijaike.org/reviewing-process/>

1. Initial Screening

All submitted manuscripts undergo an initial screening by the editorial board to assess their relevance, originality, and adherence to IJAIKE's [submission requirements](#). Manuscripts that do not meet the basic criteria may be returned to authors for revision or declined without external review.

2. Double-Blind Peer Review

Eligible manuscripts are evaluated through a double-blind peer review process, where both authors and reviewers remain anonymous. Each manuscript is reviewed by at least two independent experts in the relevant field.

3. Reviewer Evaluation Criteria

Reviewers assess submissions based on the following criteria:

- Originality and significance of the research
- Clarity and coherence of presentation
- Soundness of methodology and analysis
- Relevance to the journal's scope
- Contribution to the advancement of AI knowledge and practice

4. Editorial Decision

Based on reviewer feedback, the editorial board will make one of the following decisions:

- Accept
- Minor Revision
- Major Revision
- Reject

Authors will receive a decision letter along with anonymized reviewer comments and, if applicable, revision instructions.

5. Revision and Resubmission

Authors are expected to address all reviewer comments and submit a revised manuscript along with a detailed response letter. Revised submissions are typically re-evaluated by the original reviewers. The revised paper should be returned **as soon as possible**; normally, authors will have **4–6 weeks** to complete their revisions.

6. Final Acceptance and Publication

Once the manuscript meets all editorial and reviewer expectations, it is formally accepted for publication. Electronic publication will occur **online first** immediately upon receipt of the final version of the accepted article, provided all pending obligations, such as payment of applicable APC charges, have been fulfilled. Authors will be notified, and the manuscript will proceed to final formatting and production.

7. Ethical Standards

IJAICE upholds the highest standards of publication ethics. Reviewers are expected to maintain confidentiality, declare any conflicts of interest, and provide objective, constructive feedback. Authors are encouraged to disclose any ethical approvals, funding sources, or conflicts of interest during submission.

8. Reviewer Anonymity Policy
